

Benjamin Johnston

Software Engineer · Systems, Automation & Open Source

Columbus, OH | (614) 843-3974 | bejaunst@gmail.com | linkedin.com/in/bejaunst | github.com/cetio | cetio.github.io | U.S. Citizen

EXPERIENCE

AI Trainer, Handshake · Remote (Contract)

Nov 2025 – Jun 2026

- Built AutoHandshake!, a Selenium-based automation suite that eliminated 95% of manual annotation and triage effort across 400+ contractor hours through unattended execution, failure recovery, and audit trails.
- Evaluated 4,000+ multimodal head-to-head tasks against structured rubrics for response quality, reasoning accuracy, and domain understanding; earned the Model Validation 2 — Expert credential.
- Mentored contractors on platform operations, rubric interpretation, and efficient evaluation workflows.

Software Engineer (Freelance), Self-Employed · Columbus, OH

Jul 2021 – Present

- Authored and maintain 30+ public open-source libraries across D, C#, and C, spanning SDKs, developer tooling, and systems programming.
- Built an AI-assisted grading platform with LMS OAuth integration and automated rubric application, reaching ~95% accuracy in real classroom use and cutting instructor grading time in half.
- Developed workflow-automation tools and API SDKs for web integration and device I/O, eliminating repetitive manual processes for clients.

Search Quality Evaluator, RWS Group · Remote (Contract)

Apr 2025 – Aug 2025

- Assessed search relevance and LLM output quality against detailed rubrics across Google query simulations and third-party models, identifying failure patterns that informed ranking and UX improvements.

OPEN SOURCE PROJECTS

Selenium-SDK — Author & Maintainer | D

github.com/cetio/selenium-sdk

- Authored and maintain the de facto (#1), W3C-compliant Selenium WebDriver library for D, published on the DUB package registry: a strongly typed browser-automation API with driver auto-detection, implicit wait synchronization, and full session lifecycle management.

Chemica | D, GTK4

github.com/cetio/chemica

- Built a cross-platform desktop app for exploring chemical compounds with interactive 3D molecular visualization, unifying several scientific databases behind one interface with a local AI layer that merges overlapping entries.

Insurgent | D, JavaScript

- Developed a full-stack real-time companion client (backing library plus frontend) for an online strategy game that parses and renders 5,000+ buildings and units and 10,000+ map tiles with lazy caching over live WebSocket feeds.

Intuit | D

github.com/cetio/intuit

- Designed a LangChain-comparable LLM SDK with chat completions, streaming, batch embeddings, and tool usage as strongly typed native structures, supporting OpenAI, Claude, Qwen, and local models via OpenRouter and local routing.

TECHNICAL SKILLS

Languages: C#, D, C, Python, Ruby, JavaScript, SQL, C++, x86 Assembly

Tools & Frameworks: Selenium / WebDriver, GTK4, Node.js, Git, CMake, CI/CD, Linux

Concepts: REST APIs, OAuth 2.0, SDK design, browser automation, LLM integration & evaluation, performance optimization

Practices: Agile, Kanban, Test-Driven Development, Code Review, Open Source Contribution

EDUCATION & CERTIFICATIONS

Columbus State Community College — AAS, Software Development

Expected Dec 2026

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, SQL & Databases, Artificial Intelligence, Virtualization, Agile & Kanban

Certifications: Handshake Model Validation 2 — Expert; GitHub Foundations (PMI); Microsoft Career Essentials (Generative AI, Software Development, Azure AI, Security); SQL Programming
